PROFESSIONAL SUMMARY

Full-stack developer focused on e-commerce SaaS, React interfaces and Python automation. Builds REST APIs, authentication, payment integrations and LLM-powered agents, with project work in tenant isolation, database transactions and end-to-end testing.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, HTML5, CSS3
Frontend: React, Next.js, TanStack Start, Tailwind CSS, Zustand, TanStack Query, Three.js, WebGL
Backend and data: Node.js, Express, REST APIs, PostgreSQL, SQLite, Supabase, Drizzle ORM
AI and automation: LLM APIs, NanoBot, LiteLLM, Playwright, Telegram bots, asyncio
Integrations and tools: OAuth, Stripe, Paymob, Git, Docker, GitHub Actions, Vercel, Railway

SELECTED ENGINEERING PROJECTS

Vira | E-Commerce SaaS · **Source** 2026
- Built three React storefront templates with Arabic/English layouts, merchant dashboards, tenant-scoped SQLite storage, inventory and order tracking.
- Implemented Google OAuth with PKCE and Paymob subscription reconciliation; added Node.js and Playwright tests for authentication, tenant isolation and checkout.

StoreKit | E-Commerce and Payment APIs · **Source** 2025
- Built a configurable Next.js storefront using Supabase/PostgreSQL and Drizzle ORM; implemented Stripe Checkout with signature-verified, idempotent webhooks and transactional order updates.

My AI Agent | LLM and Browser Automation · **Source** 2025
- Extended open-source NanoBot in Python with Playwright browser tools and platform CLI wrappers for an LLM-powered Telegram assistant; added Docker deployment configuration.

Vanish Mail | Full-Stack Email Application · **Live** · **Case study** 2025
- Developed five live mail.tm inboxes with Arabic/English OTP extraction and server-side deletion; used Zustand and TanStack Query for asynchronous state.
- Sanitized email HTML with DOMPurify, blocked remote images by default and rate-limited account creation.

GitHub Bot and Reelkeep | Python Automation · **GitHub bot** · **Reelkeep** 2024
- Built a GitHub bot with encrypted credentials, repository/ZIP workflows and confirmed deletion; deployed with Docker on Railway.
- Built Reelkeep with asyncio queues, bounded concurrency, retries and SQLite persistence for Telegram media delivery.

Bilingual WebGL Interfaces | Frontend Engineering · **Selected work** 2024
- Created custom GLSL shaders, adaptive GPU rendering, Arabic/English layouts and reduced-motion support across React interfaces.

EDUCATION AND LANGUAGES

Tanta University · B.Sc. Computer Science and AI 2024 - Present
Pharos University in Alexandria · Computer Science studies 2022 - 2024
Languages: Arabic (Native) · English (Professional)
